	Drive and site infrastructure. All matters reserved except for access. Land off Towerfield Drive, Woolwell, Part of the Land at Woolwell, JLP Allocation (Policy PLY44)	Cllr Cheadle drafted response.
--	--	--------------------------------

***Application 0018/20**

After due consideration the committee would like to SUPPORT the application with the following comments.

The information provided indicates that there are no affordable homes being provided within the development. The Parish Council considered an application previously, for the site, that had an affordable home element and would like to see a proportion of affordable homes with this development.

Concerns were raised with regard to the access onto the A386, this has previously been an issue raised by highways. The access is opposite a bus stop and the proximity of the bus stop is a particular concern.

The Parish Council would like to know these concerns will be mitigated?

The Parish Council would like to be assured that the development will be of a high eco/sustainability standard.

The Parish Council would like to request that electric vehicle charging points are installed (one per dwelling).

Due consideration should be given for a S106 contribution to the Parish Council for local amenities.

****WDBC 4185/19/OPA and WDBC 4181/19/OPA**

- We understand that there will be further opportunities to comment on the proposed development between now and Dec 2020 and look forward to being advised of these.
- While the application responds to policy PLY44 in the JLP, policy PLY47 requires improvements to the capacity of the entire A386 Northern Corridor including, but not exclusive to, the reopening of the rail link from Tavistock, improved Park and Ride sites and improved cycle and walking networks. It is unclear how this development will improve the transport links as policy PLY47 directs.
- The DCC study on the A386 (referred to at the Woolwell meeting) is a draft. We would wish to understand whether the report, together with its recommendations, has been accepted or is awaiting ratification.
- DCC and PCC have recently confirmed that there is currently no funding earmarked for A386 improvements, cycle path provision within the Northern Corridor or the rail link to be provided by policy PLY47. We would wish to ensure that when the S106 agreement is drawn up, provision is made towards meeting these JLP requirements.
- On a point of detail, the applicant's traffic assessment makes two assumptions when calculating the impact of the development; that increasingly younger people do not drive and that travel outside peak flow periods is increasingly common. If these are valid, the predicted traffic flows are mitigated. However, not mentioned is that the population within the HMNA is ageing and this population is more dependent on cars than a younger population. What assumption has been made about the age profile of those who will occupy the homes within the development and has this been properly reflected in traffic flow calculations?

046/20
